The various versions of the 3642 and 3742 are identified by a product code number (catalog number) for the pump.  
The meaning of each digit in the product code number is shown below

### 3500 RPM Close Coupled Example Product Code 1BF11512

### Frame Mounted Pumps Only Example Product Code F1BF05

#### NOTE:

Not recommended for operation beyond printed H-Q curve.

For critical application conditions, consult factory.

#### NOTE:

Not all combinations of motor, impeller and seal options are available for every pump model. Contact Customer Service for information on non-cataloged order numbers

- ① 575 Volt models are available, prices may vary, lead times may be longer.  
Use the nomenclature page to create a 575 Volt Order Number.

- ② Optional Casing Rotation - to order a pump with the casing rotated, add one following suffix as the last character in the Order Number.

Rotation is as viewed from the Pump's Suction End. There is no additional charge for this service.

Suffix - Position:

R = 3 o'clock  
B = 6 o'clock  
L = 9 o'clock

10K55 Replaces 10K24. The 10K55 has a higher pressure rating than other seals offered.

Non-Standard diameter impeller trims are available for a \$35.00 list adder

**NOTE:** Impellers will be trimmed in 1/16" increments only. If you order a trim within 1/16" of the standard impeller, you will receive the standard impeller trim.

Canadian versions of the 3642 use a different nomenclature similar to the MCC models.

Based on Horsepower & hydraulic requirements of the S-Group Frame-Mounted pump, select a T-Frame Motor from motor price pages. Using Motor Frame Size, select the correct bedplate, coupling guard, coupling and motor mounting hardware from chart above. Above selections are based on Goulds' standard motors. For other motor selections consult factory. \* pertains to SSH only

The various versions of the 3656 and 3756 are identified by a product code number on the pump label. This number is also the catalog number for the pump. The meaning of each digit in the product code number is shown below.

## EXPLOSION-PROOF, PREMIUM EFFICIENCY & WASH DOWN DUTY MOTOR ADDERS

575V NOTE

F

• To determine a list price for an Explosion-Proof, Premium Efficiency or Wash Down Duty motor on an SSH or 3656 close-coupled pump, find the price of the base unit and add the appropriate List Adder found in the motor section.

• Centrifugal pumps fitted with Goulds' choice of JM, JP or T-Frame, 3ø, 575V motors have the same List Price as 3ø, 230/460V models, the lead time may be longer. Pumps fitted with your choice of other manufacturers motors may cost more.

## 3656/3756 L GROUP NUMBERING SYSTEM

The various versions of the 3656 and 3756 L Group are identified by a Product Code Number (Catalog No.) on the pump label.

The meaning of each digit in the Product Code Number is shown below. Not all combinations are possible; consult customer service for unlisted requirements.

### Example Product Code

NOTE: To find;  $HP/100 \text{ RPM} = \frac{HP \text{ at operating point}}{\text{operating speed RPM}} \times 100$ , Select coupling with next larger value.

Example: Operation at 2200 RPM with 150 HP required on a 10' Dia. flywheel.

$$\frac{150}{2200} \times 100 = 6.82, \text{ Select the coupling rated at 8.57 HP/100 with a 10" flywheel diameter} = \text{CD1050}.$$
