

PENTEK® TRI-LARM™

with Link2O™

With the Tri-Larm looking after your home, you can be at ease knowing wherever you are you will be informed of a potential problem. The Tri-Larm senses water, ambient temperature, and if your home has an internet connection/power. The Tri-Larm runs on batteries and uses a gateway to connect to the internet.

APPLICATIONS

For residential use where sensing the presence of water is desirable.

FEATURES

Detects Leaks: Place the Tri-Larm in your basement, next to your washing machine, under the sink or anywhere a leak could occur. Combine the audible alarm with text and email alerts and the Tri-Larm will keep you informed of potential problems whether you are home or away.

Freeze Detector: The Tri-Larm will detect a drop in temperature and notify you of the possibility of frozen pipes.

Power Loss: Tri-Larm alerts you if your power goes out. You'll know when your sump pump is not running and how long other appliances have been without power.

ORDERING INFORMATION

Catalog Number	Description	Gateway Included*	Weight		Carton Size
			Lbs	Lg	
WS-LINK	Water Sensor Only	No	1	.45	5" x 5" x 2"
